

Tekcel showcases new models at Sign UK

Tekcel CNC Solutions plan to use Sign UK to showcase two new models in its range of award winning CNC routers.

Tekcel routers have earned industry-wide recognition for their technical innovation and rock solid reliability. This was underlined with a Highly Commended award from the BSGA Sign Industry Awards.

Available in a comprehensive range of industry standard bed sizes, all Tekcel routers offer a wealth of class leading features, including powerful routing heads, digitally-controlled, servo motors and ball leadscrew drive systems on every axis, 'cut-to-film' vacuum bed systems and automatic tool length sensing as standard. There are also a wide range of 'must have' options on offer, including Automatic Tool Changing, Cut to Print Camera and Sheet Material Registration Systems plus some exciting new Print Finishing Systems.

Visitors to the Tekcel stand this year will have the opportunity to evaluate exciting new additions to its router range and several new products in the company's comprehensive range of high quality CNC router cutters and tooling.

Tekcel CNC Solutions can be found on **Stand B16**,
